Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This minor technical variation authorises the acceptance of three new waste codes:

- EWC 18 01 03* wastes whose collection and disposal is subject to special requirements in order to prevent infection
- EWC 18 01 08* cytotoxic and cytostatic medicines
- EWC 18 01 04 wastes whose collection and disposal is not subject to special requirements in order to prevent infection (for example dressings, plaster casts, linen, disposable clothing, diapers)

The new waste codes will be stored in the existing clinical waste buildings (A1 and A2) on the existing infrastructure, with no new or amended emissions to sewer or groundwater. The annual throughput and storage capacity will remain unchanged.

This variation also removes exclusions listed within Table S2.1 of the permit relating to H codes as these are no longer relevant due to updated Technical Guidance WM3. We have also removed the exclusion for 'Wastes that are: Clinical waste or containing clinical waste', as the permit already authorises chapter 18 EWC coded wastes from a previous variation and this variation authorises the operator to add additional chapter 18 EWC codes wastes to the permit.

We have added reference to 'Sector Guidance Note S5.06: recovery and disposal of hazardous and non-hazardous waste' and 'How to comply with your environmental permit. Additional guidance for clinical waste (EPR 5.07)' and removed reference to 'Working Plan (dated: 18/12/2013)' within Table S1.2 Operating Techniques.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
